## Summary

Full-Stack Developer and AI Engineer specializing in intelligent digital solutions and scalable applications. Expertise in modern web technologies and advanced AI implementations. Proven track record of bridging technology gaps and achieving impactful project outcomes. Seeking flexible part-time opportunities with availability for weekend and evening shifts.

## Skills

- Event coordination and organization
  - Agile project management
  - API integration and development
  - Team leadership and collaboration
  - Problem solving and resolution
  - Business growth strategies
  - Next.js and Node.js development
  - Express framework expertise
- MongoDB database management
  - Python programming skills
  - Machine learning applications
  - Automation techniques
  - Chatbot development solutions
  - SQL database management
  - APIs and web services integration
  - Data science fundamentals

## Personal Information

Title: Software Engineer | Full-Stack Developer | AI-Powered Solutions Builder

## Experience

- Event Head**, 03/2024 - Current  
**Superior AI Society** - Lahore, Punjab
  - Leading AI-focused events, workshops, and knowledge-sharing initiatives to create collaborative growth opportunities in AI and technology.
